Subject: MCB shed

Ginny,

Our rough estimate that we received was \$15,000 for the shed and concrete slab.

This was originally slated for a 16x24 structure.

Location was flexible, but I think we figured it would be roughly where the existing structure is, depending on the exact topography of the land.

We were hoping for up to \$10,000 from the City with the hope that the remainder will come from donated materials and labor and/or other business donations.

We'd like to use as many cash donations as possible for the water/sprinkler system after the shed project, so hoping that the City's funding and material/labor donations will get us completely funded for this project.

Thanks for adding this to the agenda for next Monday. If there is any other info anyone needs, please let us know.
